CASE NO. 8889

O R D E R

Copperfield Disposal System, Inc., (Copperfield) filed an Application for Rehearing on February 14, 1984. Copperfield contends that the rates it proposes to charge and which the Commission approved are based on a fully loaded plant and are, therefore, not "promotional."

The Application requests relief from the requirement of notice to the customers of the possibility of future rate increases due to loss of subsidies of operating and capital costs from the developer.

The Application further seeks an Interim Order granting the certificate of convenience and necessity so that construction of the treatment plant may begin.

IT IS THEREFORE ORDERED that the Application for Rehearing be and it hereby is granted for the purpose of reviewing the Commission's policy on which the notice requirement is based.

Concomitantly, the Commission will review the financial status of the applicant to determine if it can be relieved of the notice provision.

Neither of these matters relates to the appropriateness or validity of the certificate of convenience and necessity which should be granted effective with the date of this Order.

IT IS FURTHER ORDERED that:

1. Each owner of Copperfield shall individually file a financial worth statement;

2. Each owner of Copperfield shall individually file a statement and a Third Party Agreement that it will continue to subsidize the capital costs and monthly operating expenses of the treatment plant until all lots in the development are sold and a statement that all future rate adjustments will be based on a fully loaded treatment plant;

3. The Commission will review the appropriateness of applying the notice requirement to Copperfield in light of the information to be supplied; and

4. The certificate of convenience and necessity is granted subject to all other conditions of the Commission's Order in Case No. 8889 entered January 26, 1984.

Done at Frankfort, Kentucky, this 5th day of March, 1984.
